

The area within the Gospel Rock Neighborhood Plan (GRNP) is one of the most spectacularly beautiful and ecologically sensitive places on the entire Sunshine Coast, and the last stretch of natural waterfront within the Town of Gibsons. Trees over a century and a half old stand in the mature dryland Douglas Fir-Arbutus forest which stretches from the upper bluffs down to the shoreline.

This type of forest grows exactly where people want to work and live—in sunny areas near the shoreline. As a result, we have logged and developed almost all the stands on the Sunshine Coast. Only a couple of small parcels like this remain between Gibsons and Pender Harbour. This is the rarest of the rare—and all the more valuable for being right next door to the heart of a community.
