

Our Mission

Last Updated: Wednesday, 26 March 2008 14:07

To preserve the natural biodiversity of the Sunshine Coast region for the present and future benefit of humanity and all life. Specifically, to:

1. Conduct research to inventory and describe our remaining natural areas with the goal of identifying land and waters important for the preservation of biodiversity.
2. Work to retain such lands and waters in a natural state and make them available for public enjoyment where possible.
3. Raise public environmental and conservation awareness by sponsoring educational programs and workshops and by supporting low impact recreation.
